

ROUTD'AF

Routes d'Afrique, Routd'Af for short, was established in April 2013 to build high quality cost and time infrastructures. A fully owned Cameroonian company, Routd'Af specialises in the construction, renovation and maintenance of asphalt roads and bridges as well as clean-up work. From 2015, Societe Generale helped us by setting up both medium-term credit lines, particularly security lines, and especially funding that was particularly appropriate at the time of the lease. What I appreciate about my relationship with Societe Generale is essentially the ability to listen.
